## ABOUT US

For the past 20 years, NAROO has devoted itself to designing and creating products that match riders' needs

**NAROO**  
MASK

### HOW IT STARTED

Our team of motorcyclists from all over the world, known as the NAROO International Design Group, came up with solutions to match the specific needs of their fellow riders. Despite the ups and downs since 2002, we are stoked to provide people like you with the highest-quality headgear. We live and breathe our every day with this goal in mind.

### A PRODUCT FOR EVERY NEED

Each of our products was born from the needs of individual motorcyclists, ranging from scooter riders to BMXers to snowmobile lovers.

### DEVELOPED IN-FIELD

Here at NAROO, we put our passion for an active lifestyle into our work. We choose the best quality materials, pay the utmost attention to product details, test the product ourselves, and work closely with in-field collaborators.

### WE ARE HEADWEAR SHARKS

We are the experts in this field and we know what we're doing. We merge our exclusive technology with NAROO's core message, "Free to Breathe." Each of our products aligns with this message through technological features like MICRONET Filtering Fabric, 3D Air-Room Ex-Bone, elastic fabrics, and unique stitching and designs.

**State-of-the-art Under Helmet Experience**

**Naroo F3F**  
Naroo F3F is a high-quality, high-performance balaclava that provides maximum protection and comfort. It is made from a special fabric that is both durable and breathable. The F3F is available in a variety of colors and is a great choice for anyone looking for a high-quality balaclava.

**Naroo N3F**  
Naroo N3F is a high-quality, high-performance balaclava that provides maximum protection and comfort. It is made from a special fabric that is both durable and breathable. The N3F is available in a variety of colors and is a great choice for anyone looking for a high-quality balaclava.

**Naroo F3E**  
Naroo F3E is a high-quality, high-performance balaclava that provides maximum protection and comfort. It is made from a special fabric that is both durable and breathable. The F3E is available in a variety of colors and is a great choice for anyone looking for a high-quality balaclava.

**"DO YOU RIDE IN THE FALL OR WINTER WITH BALACLAVA?"**

Best Winter Motorcycles Balaclavas

Naroo FoF Balaclava

Motorcycle balaclavas are made from wool. However, wool can be hard to maintain, so modern motorcyclist balaclavas are usually made from a mixture of fibers that allow them to be easily maintainable and more durable. The best balaclava is far from obvious, but it covers your most vulnerable balaclava from inside your helmet. The wool is soft and comfortable, but it covers your most vulnerable balaclava from inside your helmet. The wool is soft and comfortable, but it covers your most vulnerable balaclava from inside your helmet.

Of all the products, the Naroo F3E is particularly impressive. Both are made from similar fibers and offer similar performance but vary in price. Some shade your elements of the F3E and F3F include moisture wicking, wicking and moisture fabric, UV protection, and high breathability.

**"SHOULD YOU WEAR DUST FILTERING MASK?"**

Wear a Dust-Filtering Mask

It's worth noting that a dust filter is a significant first step in countering dust exposure, but it isn't a comprehensive solution on its own. From full face helmets about those with a good fit, the Naroo F3E is an excellent choice. It's lightweight, provides ample head dispersion, and uses breathable fabric that gains nicely with a try helmet.

The issue with many low-quality balaclavas is that they can move around under the helmet, obstructing visibility. The N3F has an elastic band that ensures the fabric doesn't slide over your eyes. The band also holds the upper part of the mask in place if you throw the mouth cover to one side.

The N3F is constructed using a quick-dry, dust-filtering fabric that will hold its form even after multiple wash cycles.

**"HOW YOU CAN IMPROVE YOUR COMFORT WHILE RIDING"**

Wear a Balaclava/Dust Mask

When it comes to a balaclava, there's no right or wrong. It's determined by your needs. If your primary concern is making an open-face helmet without adding a lot of bulk, the Naroo F3E is an excellent choice. It's lightweight, provides ample head dispersion, and uses breathable fabric that gains nicely with a try helmet.

The issue with many low-quality balaclavas is that they can move around under the helmet, obstructing visibility. The N3F has an elastic band that ensures the fabric doesn't slide over your eyes. The band also holds the upper part of the mask in place if you throw the mouth cover to one side.

The N3F is constructed using a quick-dry, dust-filtering fabric that will hold its form even after multiple wash cycles.

## PRODUCT SEGMENTATION BY OCCASION

NAROO products cover a wide range of motorcycle types and environmental conditions. Target your customers with our customized collection.

## TECHNOLOGIES

### ANTI-FOG & EASY BREATHING

ELASTIC 3D AIR-ROOM EXOSKELETON STRUCTURE & EX-HALE AIR REDIRECTING MODULE

EX-BONE is an exclusive air room structure that creates a barrier between the fabric and one's mouth to make it easier to speak and breathe, and to prevent visors and goggles from fogging.

## BALANCED FILTERING

UNIQUE, BREATHABLE, FILTERING TECHNOLOGY - MICRONET

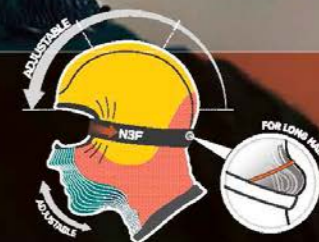

MICRONET is a special fabric exclusive to NAROO that filters fine particles as small as 1.7 Microns (40 times smaller than a grain of sand) while at the same time, letting one breathe easily.

## UNIQUE DESIGN

FLAT SEAM STITCHING, ELASTIC SMOOTH SKIN AND SLIM FIT

We designed our products with varying fabric thicknesses, special stitching, and banding to ensure your unobstructed vision and comfortable mask adjustment.

## PRODUCT COLLECTION FOR DUST

## RIDE DUSTY ROADS WITHOUT A CARE

---

Wearing a full-face helmet is a significant first step to counteracting dust exposure, but it isn't a comprehensive solution. If your full-face helmet doesn't have a chin guard, it allows the formation of a channel of air that flows into the helmet and brings dust along with it. Plus, if you crack your visor open at some point, you will expose your face. Here is where a dust-filtering mask or balaclava comes in.

# MICRONET™ | Exclusive Fabric Filtering Technology

In 2012, the rising pollution levels in cities concerned us, which inspired the creation of MICRONET, our filtering fabric. MICRONET is a special fabric exclusive to NAROO that filters fine particles as small as 1.7 Microns (40 times smaller than a grain of sand) while at the same time, letting you breathe easily. Unlike conventional filtering technologies that use electrostatic principles, we at NAROO developed MICRONET filtering fabric with special knitting made up of entangled threads that block microscopic particles while still allowing air to pass through.

## MICRONET™ Filter

MICRONET, a filter exclusive to NAROO, is made from a special fiber. It differs from a normal filter structure that works on electrostatic principles. It blocks 99% of dust particles with sizes ranging from 1.7 to 2.6µm and can be washed.

Ultrafine dust 2.5µm    Fine dust 10µm    Pollen 30µm

## Washable and Reusable

Can be repeatedly washed and used as long as desired. The MICRONET filter maintains filtration performance even after 100 washes.

### CERTIFIED TECHNOLOGY

**BOKEN QUALITY EVALUATION INSTITUTE**  
Filtration Efficiency certification

BOKEN is Japan's leading comprehensive testing organization that conducts testing and research with a focus on not only textiles but lifestyle goods.

**ALLERGY UK**  
Allergy Friendly Product Award Certification

The Allergy Friendly Product Award is for products that are potentially of benefit to people affected by allergy, asthma, or sensitivity and are unlikely to cause a reaction.

# FOR ON-ROAD MOTORCYCLES ON DUSTY ROADS

Full-Face and Half-Face Balaclavas with MICRONET™

*"Of all its products, the Naroo F3H and F3F are particularly impressive. Both are made from similar fabrics and offer identical features but vary in shape. Some stand-out elements of the F3H and F3F include moisture wicking, washable and reusable fabric, UV protection, and high breathability."*

**motorbikewriter**

MOTOR BIKE WRITER MAGAZINE

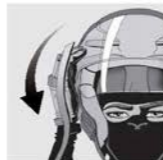

**F3F**

## Lightweight Filtering Moisture-Wicking Breathable Balaclava

A sleek, wrinkle-free appearance is the preferred look for many riders that is also functional. The F3F balaclava has different fabric tensions around the eyes keep your vision window rounded and clear, unlike the difficult-to-see-through shape of other balaclavas. Also, sweat under your helmet dries quickly so you can stay cool and dry no matter how long the ride.

# FOR OFF-ROAD MOTORCYCLES ON DIRT TRAILS

Lightweight, Quick-Dry, Easy-To-Breathe

It's suitable for summer riding

AARON

I have the N3F motorcycle balaclava. Nice fit, but feels thinner compared with the F3F version. Durable quality as expected from Naroo. I tried this with my full face arai helmet and it's very comfortable. It has a stretchy material around the front to let you expose the nose and mouth areas by design. It's suitable for summer riding. I'm happy with my balaclava

X3F

### X-Fiber Lightweight Breathable Balaclava

The X3F lightweight balaclava fits snugly, allowing your helmet to sit comfortably on top. Carefully positioned seams minimize irritation, while the quick-dry X-Fiber fabric keeps you cool, dry, and comfortable throughout your activities while promoting hygiene and overall comfort.

# FOR ON-ROAD MOTORCYCLES IN COLD WEATHER

Warm Neck Gaiter and Wind-Blocking Balaclava with MICRONET™

*“Made from a combination of Tactel fabric and fleece, it’s been designed to keep you warm even in the harshest cold.*

*The elastic construction also wraps snugly around your head and face, preventing the mask from sliding over your eyes or off your head every time you put on or take off your helmet.”*

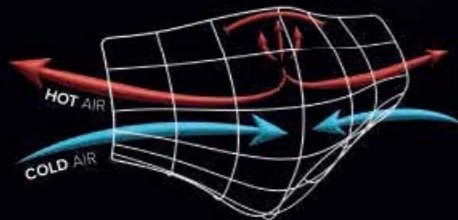

WEB BIKE WORLD MAGAZINE

# FOG-FREE RIDE

Naroo's Advanced Anti-Fog Ventilation System literally pulls air through vents on both sides, keeping the rider fog-free.

## ADVANCED ZV9H CARBON PATTERN VENTILATION SHELL

The innovative ventilation system is specifically designed to combat fogging by redirecting warm air to the sides away from the visor, eliminating fogging and helping humidify inhaled air. A wide range of uses is designed to be worn inside a full-face helmet as well as an open-face helmet.

## ZV9H | Breathable Anti-Fog Half-Balaclava with Advanced Ventilation System

We take our anti-fog function very seriously, especially during the winter season. That's why we've developed a new ventilation system that redirects warm air to the sides, preventing foggy glasses while offering protection from directly inhaling cold and dry air. Our product also features unique stitching, knitting, and a long knitted neck for added comfort and functionality.

Advanced Anti-Fog Ventilation System

Carbon Pattern Neoprene Combination Guard

State-of-the-Art Stitching

### FEATURES

- Innovative ventilation system is specifically designed to combat fogging
- By redirecting warm air away from glasses, it eliminates fogging and helps humidify inhaled air
- The half-balaclava features a thick mixed-weave fabric that offers excellent wind-proofing and an enhanced fit for optimal comfort
- Crafted from a moisture-wicking nylon blend fabric, it keeps you warm and dry by efficiently drawing moisture away
- With special under-eye stitching, the half-balaclava ensures that the fabric won't obstruct your vision, allowing for clear visibility during your ride.

## PRODUCT COLLECTION FOR SNOW

# FOR OFF-ROAD MOTORCYCLES ON SNOWY TRAILS

*Thermal Neck Gaiters and Balaclavas for Winter Rides*

You're an "all-or-nothing" kind of rider. The road to beauty is hard, fun, and fast. But the destination, oh, the destination is something that you take time to enjoy. Warm in your balaclava that keeps your clothes snow-free, and your Bluetooth communication unhindered, you can stop wherever along the ride you want to enjoy the view - before tackling the trails head-on once again.

## N5F | Thermoregulating Balaclava with Extended Neck Coverage

When it comes to winter balaclavas, breathability and extended neck coverage are essential. We designed this balaclava to offer both superior protection and breathability alongside remarkable comfort. With carefully selected fabric thickness variations and special stitching, we eliminate the need for excessive layering, this is what you call a motorcyclist's best riding partner.

## N9H Thermal Half-Balaclava With Specialized Stitching

One of the biggest comments we hear as experts in the mask industry is how a balaclava may be good with one function, but not necessarily another. That's why we've designed the N9H with fabric that won't interfere with your vision and whose special nylon blend knitted fabric will also keep you warm and dry. The unique stitching gives it a better fit and easier adjustment on the go.

Distribution Bands

Ventilation Holes

Unique Stitching for Wide View

<b>MSRP</b>	38.00 USD	<b>Materials</b>	65% Nylon, 25% Polyester, 6% Polyurethane
<b>Sizes</b>	Universal	<b>Dimensions</b>	22cm x 34cm (W x L) <b>Made in Korea</b>

## OUR POSITIVE IMPACT ON THE WORLD

Not only are we dedicated to being a bridge for your individual journey, but also to creating a positive impact on the world. NAROO actively supports and promotes community growth and the clean-up of our environment.

### CARING FOR NATURE

**Active Contribution.** NAROO is an active contributor to the eco-projects of Handprint, a non-profit organization that curates the world's most effective impact organizations to ensure your contributions will change our planet for the better and save lives.

**Cleaning Up Our Oceans.** Meet Seven Clean Seas, an organization based in Indonesia on a mission to preserve the marine environment by ridding the seas of plastic for good. So far, they've cleaned a whopping 242,800 kg of ocean plastic since they started in 2018.

**Listening to the Local Community.** Local volunteer teams identify where their effort is most needed, and then lead missions to rescue plastic in these areas.

**Complete Solution.** Seven Clean Seas recovers plastic from oceans. They then recycle it, incinerate it, or place it in a secure landfill.

### CARING FOR PEOPLE

- Monetary Contributions to One Body Spirit
- Monetary Contributions to Korea Food for the Hungry International
- Products Donation to Seoul Association Institute for the Homeless
- Products Donations to Projects of Community Chest Korea
